

### Available Optional

Brake, Clutch & Fuel Carbon Hoses  
Bridge Fork & Steering Stem in Ergal CNC Machined  
Handelbar Support in Ergal CNC Machined  
Reinforced Footrest Support  
Ergal Footrest CNC Machined  
OFF Switch on Steering Frame  
Brake & Clutch Lever CNC machined  
Hand Made Expanded Water Cooler  
Silicon Water Hoses "Yellow Racing"  
Silicon Breather Hoses "Yellow Racing"  
Weight Reduced Gearlever  
Reinforced Engine Protection Plate  
Exhaust Pipe in Titanium  
Carbon Rear Fender Holder  
Chain Tensioner Ergal  
Carbon Front Light Racing  
Carbon Fork Case Protection  
Carbon Rear Disk Cover  
Carbon Chain Case  
Carbon Sprocket Cover  
Carbon Ignition Coil Holder  
Carbon Electric Stay/ECU  
Weight Reduced Front Frame Links  
Rear Suspension Links Ergal  
Programmable Fuel Injection ECU  
Wiring System Racing (reduced)  
"Yellow" color kit

### Our Services includes:

Suspension setup & tuning  
Engine setup & calibration  
Rider school & Training programs  
Race support with people and trucks  
Special parts development & supply  
Trial Indoor Show

PROFESSIONAL SOLUTION  
FOR TRIAL COMPETITIONS

*World Premiere*

*Montesa 4RT Future 300 cc*

*Montesa 4RT Future 125 cc*

# FUTURE 300 cc

The Bike for the Professional Rider.

Starting from the standard bike we heavily modify the engine to maximize the performance.

The engine displacement is increased from 250cc to 300cc and the engine head is re-tuned together with the throttle body & the exhaust system.

## Technical characteristics:

Displacement: 300 cm<sup>3</sup>

Bore x Stroke: 82,5 x 54,2 mm

Special cylinder insert with F1 surface treatment

New piston with F1 segment technology

Titanium engine valves with bigger dimension

New camshaft with new cam profile

Variable pitch valve spring

Re-balanced engine crankshaft

Re-balanced flywheel

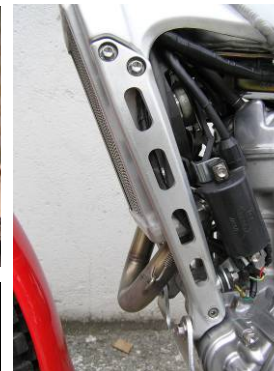

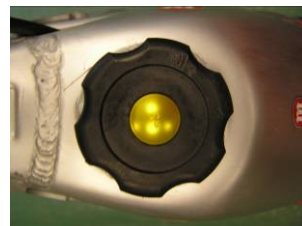

Hi torque clutch with stronger rubber inserts

Aluminum clutch disks with Titanium-Nitride coating

Titanium exhaust pipe with flow control

Engine ECU with two selectable engine maps while driving

Contact us to arrange for a test ride and commercial offer. → [info@bosisteam.com](mailto:info@bosisteam.com)

# FUTURE 125 cc

The Bike for the Young Champions

Starting again from the standard bike we modify the engine to reduce the displacement from 250 cc to 125 cc to offer a competitive 4T bike to the young rider.

The Future 125cc maintain all the excellent feature of the bigger sister as EFI & Programmable ECU but with a smaller power unit.

## Technical characteristics:

Displacement: 125 cm<sup>3</sup>

Bore x Stroke: 54,2 x 54,2 mm

Special cylinder insert with F1 surface treatment

New piston with F1 segment technology

New camshaft with new cam profile

Variable pitch valve spring

Re-balanced engine crankshaft

Re-balanced flywheel

Titanium exhaust pipe with flow control

Engine ECU with two selectable engine maps while driving
